

How an opportunity is registered and recorded

VERSION	DATE OF ISSUE	STATUS	GOVERNED BY
1.0	September 6, 2026	Operational	Rules of Engagement §3
SUBMIT TO			
AdaptCloud channel contact			

1

How it works

1

Submit

the
fields
at
section
2,
before
substantive
joint
activity
on
the
opportunity.

2

Decision within five business days:

accepted,
rejected
with
a
stated
ground,
or
duplicate.
Silence
is
acceptance.

3 Acceptance creates a tracker record

and
starts
the
90-
day
protection
period.

4 Keep it current.

One
recorded
activity
every
30
days
holds
protection
open.

Register early, not when the deal looks certain. Conflicts are decided on the tracker record, so an opportunity worked but never registered has no protection to assert. Registration costs nothing and is reversible.

2 Registration form

EXHIBIT 1 — FIELDS SUBMITTED BY THE PARTNER

FIELD	REQUIRED	NOTE
Partner legal entity	Yes	Contracting entity, not trading name
Partner contact	Yes	Name, role, email. The person accountable for pursuit
Partner delivery lead	Where services attach	Named individual, per qualification check Q4
End client legal entity	Yes	Registration attaches to this entity
Client site or business unit	Yes	Where the account is large or federated
Registered use case	Yes	Workload, business unit, or compliance scope. Protection extends no further than this description
Client problem statement	Yes	One or two sentences. Qualification check Q1
Estimated host or enclave scope	Yes	Drives tier and pricing
Products anticipated	Yes	Catalog references
Services attach	Yes	Partner-delivered, AdaptCloud co-delivery, or none
Estimated value and close date	Yes	Best estimate; not binding
Client contact known	Yes or no	Contact details not required at registration
Prior AdaptCloud contact	Yes	Declare any known prior contact with this account
Environment prerequisites	If known	Operating systems, cloud tenancy, access model

Fourteen fields, of which twelve are always required. The form is deliberately short: a registration that takes an hour to complete does not get completed, and an unregistered opportunity is an unprotected one.

3 Decision

AdaptCloud returns one of three outcomes within five business days.

OUTCOME	WHEN	EFFECT
ACCEPTED	No conflicting prior registration and no documented prior direct pursuit	Tracker record created; protection period starts
REJECTED	Prior accepted registration for the same account and use case, documented prior direct pursuit, or a materially incomplete submission	Ground stated in writing. Partner may resubmit if the ground is incompleteness
DUPLICATE	Same account and use case already registered by another partner	First accepted registration prevails. A different use case at the same account may be registered separately

4 Tracker record

The tracker is the system of record and the primary evidence in any channel conflict. AdaptCloud maintains it; the Partner may request its own records at any time.

EXHIBIT 2 — FIELDS ADAPTCLOUD MAINTAINS

FIELD	SOURCE	NOTE
Registration ID	Generated	Format REG-YYYY-NNN. Quoted in all conflict correspondence
Submitted, decided dates	Generated	Decision window measured from submitted
Status	Maintained	Section 5 vocabulary
All submitted fields	Form	Stored as submitted, not edited
Protection expiry	Calculated	Acceptance plus 90 days, plus any extension
Activity log	Partner-reported	Date and one line per activity. Holds protection open
Last activity date	Calculated	Drives the 30-day inactivity notice
Notices issued	Maintained	Inactivity notice, cure deadline, extension grants
Pricing approved	Maintained	Agreed structure and any approved floor exception
Outcome	Maintained	Won, lost, lapsed, withdrawn, with date
Conflict record	Maintained	Any dispute raised, decision, and remedy

5 Status vocabulary

A registration holds exactly one status. The terms are closed; no other value is recorded.

Submitted Received, decision pending. Protection has not started.

Accepted Protection running. Activity expected every 30 days.

Rejected Not registered. Ground recorded.

Notice Inactivity notice issued, cure period running.

Lapsed Cure period expired without activity. Account returned to open status.

Won Contracted. Renewal treatment applies while the Partner remains active.

Lost Client selected another path. Closed.

Withdrawn Partner withdrew. Closed immediately, no cure period.

Expired Protection period ended without extension.

Lapsed and expired are different, and both require notice. Lapsed follows inactivity and a cure period that ran out. Expired follows the clock running down while the Partner was still active but did not request an extension. Neither is applied silently.
