

ADAPT CLOUD

Ideas to impact.

FOR BUSINESS AND TECHNOLOGY LEADERS

Ongoing AI advisory and engineering.

Adapt Cloud helps business and technology leaders put Claude to work in their operations and improve systems already in use. The relationship continues as business priorities, model behavior and operating costs change.

An annual service built around your priorities

An initial term of 12 months or longer, renewable by agreement. Monthly working reviews and a rolling 90-day plan guide the advisory and engineering work.

A plan for the next 90 days

We establish the current position with your business and technical owners. Together, we choose the improvements worth pursuing and revise the plan as evidence and priorities change.

Engineering capacity to act on the plan

The agreement reserves capacity for approved improvements. Each has a scope, an owner and acceptance tests. Larger changes are scoped separately, with your approval before work begins.

A business review of the results

Monthly reports cover performance, total cost, completed work and unresolved issues. Quarterly reviews assess whether the benefit justifies further investment and what should change.

A named Adapt Cloud delivery lead stays accountable throughout the term.

HOW THE SERVICE WORKS

A clear cycle for each improvement.

PromptForce.AI from DayTwoAI

The engagement includes PromptForce.AI from DayTwoAI.com as a platform accelerator for readiness assessment and reusable development components. Adapt Cloud leads the advisory, integration and engineering, and reports on the agreed work.

Platform access, usage, support and provider responsibilities are set out in the agreement.

- | | |
|---------------------|---|
| 01 ASSESS | Review performance and business priorities. Select the next improvement and agree on its expected value. |
| 02 AGREE | Confirm the owner, scope, capacity and acceptance tests before work begins. |
| 03 IMPLEMENT | Develop and test the change, obtain the required approvals and release it with a rollback plan. |
| 04 VERIFY | Check results against the baseline and quality requirements. Accept, revise or stop the change, then update the next cycle. |

Clear commitments and decision rights

The statement of work names who approves priorities and releases, the capacity included, and the remedy for missed commitments. Agreed measures may include handling time, correction rates or cost per completed task. Missing evidence is reported openly.

Before renewal, we review the business case and agree on the next term. Reporting, reviews and approved engineering continue after each release.

Discuss your AI priorities with us.
